

BioTech 2017

and 7th Czech-Swiss Symposium with Exhibition

Scope

BioTech 2017 and 7th Czech-Swiss Symposium with exhibition will cover all important aspects of advanced biotechnologies. **Attention will be paid to the key technologies playing important role in bio-based economies.** Microorganisms such as bacteria, yeast, and microalgae, and their enzymes, are used for manufacturing a wide range of products in sustainable, forward-looking bioprocesses. These products represent high-performance chemicals or ingredients in demand for foodstuffs, animal feed, cosmetics and pharmaceuticals.

Lectures will be organized in following sessions:

- **Medical and Pharmaceutical Biotechnology**
- **Microalgae Biotechnology**
- **Environmental Biotechnology**
- **Food and Agriculture Biotechnology**
- **Biorefinery**
- **Industrial Biotechnology**

Selection criteria for oral and poster presentations will be based on novelty, potential for practical application and scientific merit. The official conference language will be English.

Plenary lectures

Wilhelm Ansorge (ETH Lausanne):
**PERSPECTIVES FOR DNA SEQUENCING TECHNIQUES,
APPLICATIONS IN GENOMICS and MEDICINE**

Martin Jinek (University of Zurich):
**MOLECULAR MECHANISM OF THE GENOME EDITOR
NUCLEASE CAS9**

Important dates

February 28, 2017	Early bird registration deadline
May 18, 2017	Registration and payment deadline
June 13-17, 2017	Conference

For Exhibitors and Sponsors

Participation in this event will help to promote your company as a key player in the biotechnology sector, build connections with new clients, and seek research partners or future employees among the top students attending this event.

For detailed offer for Exhibitors see the conference website.
